| 26. Michael Miller | Unc. | 50 | 279-2x |
| 27. Todd Shoup | Mks | 50 | 242-2x |

1. These are the no. of shots and scores that were reported to the NRA. Classification can be determined by dividing total score by the number of 10 shot strings fired. Example: 300 shots equals 30 10 shot strings. NRA will classify a shooter after 120 shots for record have been reported. I will assign a range classification to unclassified shooters for league award purposes.

2. Unc. = Unclassified

3. Only the six highest scores of the eight league matches were reported to the NRA. Your reported score and total x count will not be the same as your grand aggregate shown on the Oct. match bulletin if you have fired more than 6 matches.
